

2025

MIPS ACTION PLAN

YOUR 2025 MIPS READINESS GUIDE

Ensure the financial success of your practice by avoiding a negative 9% payment adjustment on your Medicare reimbursement! To set your practice up for success, follow our 2025 MIPS Action Plan for a potential positive 9% payment adjustment!

1. Determine Eligibility Status

- Verify your clinician eligibility at <https://qpp.cms.gov/participation-lookup>
 - Set-up a QPP account and connect to your practice here <https://qpp.cms.gov/login>
- Make note if you have clinicians who are part of an APM and have different reporting requirements
 - NEW in 2025 - APM participants may no longer be exempt from reporting and have specific requirements to meet
- Determine if you are required to report or if you can opt-in to the program
- Decide whether you will report as an individual (by NPI) or as a group (by Tax ID)

2. Set Practice Goals

- Do you want to avoid a negative payment adjustment?
 - There is no longer a COVID-19 hardship available and switching EHRs or Tax IDs will not qualify for a hardship
- Are you looking to earn a positive adjustment?
 - Scoring over 75 points under MIPS will earn you a positive payment adjustment

3. Understand the Financial Impact

- Identify your annual Medicare Part B reimbursement amount and calculate what a -9% penalty would cost you in lost revenue
- Understand what a potential +9% incentive could earn you in additional reimbursement
- Determine the ROI on working with a MIPS expert like DAS!

2025

MIPS ACTION PLAN

4. Create an Action Plan

- Identify which staff will be responsible for your MIPS reporting
- Review and select measures for:
 - Quality (based on 2025 benchmarks released by CMS)
 - Promoting Interoperability (required measures & review exclusions you may qualify for!)
 - Improvement Activities (NEW requirements in 2025 only report the minimum necessary)
- Understand how the Cost Category impacts your score by reviewing previous performance and scores in your QPP portal
- Create an audit folder to maintain documentation for a MIPS data validation audit (DVA)

5. Understand New Program Requirements & Regulations

- Make sure you are using Certified EHR Technology (new requirements in 2025 & 2026)
- Evaluate other regulations that impact or overlap with MIPS
 - State PDMP and eCR requirements, Information Blocking rules, ASC CAHPS requirements, etc.

NEED HELP? ASK THE EXPERTS!

DAS Health offers tailored MIPS consulting services to simplify this process, ensuring accurate submissions, maximizing incentives, and avoiding penalties. Email us today at GovernmentIncentives@DAShealth.com to get started!
