## Is Your Organization Experiencing Tech Debt?

## Understanding Tech Debt 🛞

#### Are rising costs, reduced productivity, or security risks affecting your business?

These are signs of tech debt—outdated, inefficient, or unsupported technology. Left unchecked, tech debt slows your business and increases vulnerabilities. Use this quick checklist to spot where your tech needs an upgrade.

## Unlock Efficiency: The Checklist to Identify Your Tech Debt

Check all that apply to help identify if your organization is experiencing technical debt and where modernization could improve your technology and efficiency.

### **Multiple Systems**

• Do you have more than one system for similar functions? (Phone System, EHR/PM, CRM, Email, File Storage)

Is this complicating support and troubleshooting, leading to higher costs?

**On-premise Servers Instead of Cloud or Hybrid Solutions** 

• Are outdated on-premise servers preventing you from scaling efficiently and securely?

#### Servers Over 5 Years Old

• Are your older servers putting you at risk of failure or slowing down operations?

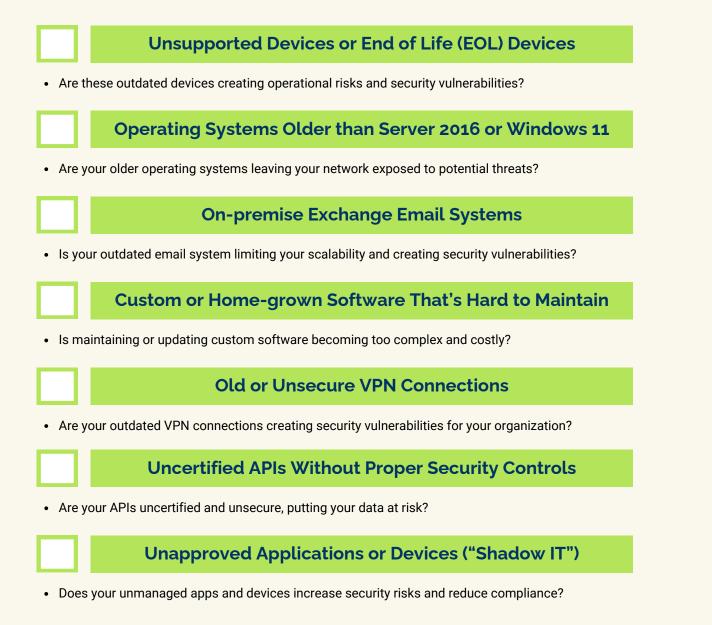

Workstations or Laptops Over 4 Years Old

• Are aging devices negatively impacting your team's productivity and security?

#### Firewalls, Routers, or Switches Over 5 Years Old

• Is your network infrastructure struggling to keep up with modern security and performance demands?
